

More than just a pretty face

As stylish as each of these patterns are, they offer the strength and design flexibility of heavy glass without the traditional green edge effect of glass with high iron content.

The best of both worlds approach makes this combination ideal for a variety of applications including:

- Shower doors and tub enclosures
- Patio furniture
- Interior partitions
- Translucent door treatments
- Decorative furniture
- Palladium windows
- Lighting fixtures
- Foyers and vestibules

An overview of a company with a different view

Whether you're a homeowner, designer, architect or contractor, when you're buying a product as important as glass, you need to be sure of not only the product, but the company that makes it. When it's AFG Glass, you can be sure of both.

With locations strategically located across North America, AFG Glass can ensure availability and quick delivery. AFG Glass is committed to supplying quality products and providing superior customer service—setting the standard for the entire glass industry.

Introducing Heavy Krystal Patterns From AFG

## Looking at glass in a whole new light

Introducing AFG Heavy Krystal Pattern Glass, the thickest and most fashionable glass of its kind on the market today. This new, upscale glass product is the combination of the best of two successful glass categories: heavy glass thickness with a low-iron glass composition.

*Dividing an area while diffusing the light, these patterns literally project a room's personality.*

## Patterns with personality

With several fashion forward patterns to choose from, new Heavy Krystal Pattern Glass from AFG is the perfect compliment to the most classical or modern of designs. Any room, any style, Heavy Krystal Pattern Glass is exactly what you need to divide space, share the light and make an impression no one will ever forget.

Whether you prefer the flowing ripples of Glacier™, the subtle texture of Serenity™, the more kinetic appearance of Rain™, the calming beauty of Storm™ or the classic simplicity of Textured Flutex™, with this selection, you're sure to find a pattern that will express the mood and personality you desire.

*Perhaps one of the most elegant aspects of Heavy Krystal Pattern Glass is the unique balance of intimacy and shared space.*

## Five unique Heavy Krystal Pattern designs

True to its name, **Serenity** presents everything in a different light. Its subtle texture adds dimension to what you see even as it affords a refined sense of privacy.

Inspired by the tranquility of a frozen tundra, **Glacier's** flowing ripples exude a sense of calm and well-being.

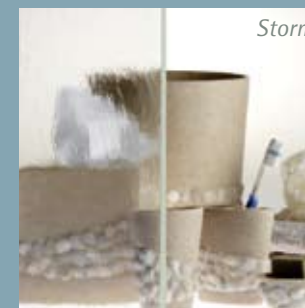

With a rippled effect like that of a summer shower, **Rain** brings a touch of the outdoors inside with its combination of natural harmony and kinetic beauty.

## Upscale appearance

Simulating the effect of streaming rain, **Storm** couples clarity with a distinct beauty that's easy to appreciate, wherever it is used.

**Textured Flutex**, with its subtle texture and simple lines, has a look of classic simplicity that can fit beautifully into any décor.

*Depending on the look you desire, take your choice of Heavy Krystal Rain, Serenity, Glacier, Storm or Textured Flutex. Just consider these benefits:*

- Ideal for everything from shelves to shower doors
- Perfect for homes old and new
- Low iron content means no "green" edge
- Easily cut to your specifications
