

WE MADE IT PERFORM.

Few things enhance the beauty of your home as dramatically as windows. Thanks to advancements in energy efficient glass, your home

can now have more windows, larger windows, and more unusual configurations. The applications and possibilities are limited only by your imagination.

That's the idea behind Comfort E2™ from AFG—a high-performance, low emissivity glass so efficient, you can have the windows you've always wanted.

Windows can become an integral part of your home's design with Comfort E2, enabling you to bathe in the warm glow of natural light while allowing you to see and enjoy the beauty of the outside world.

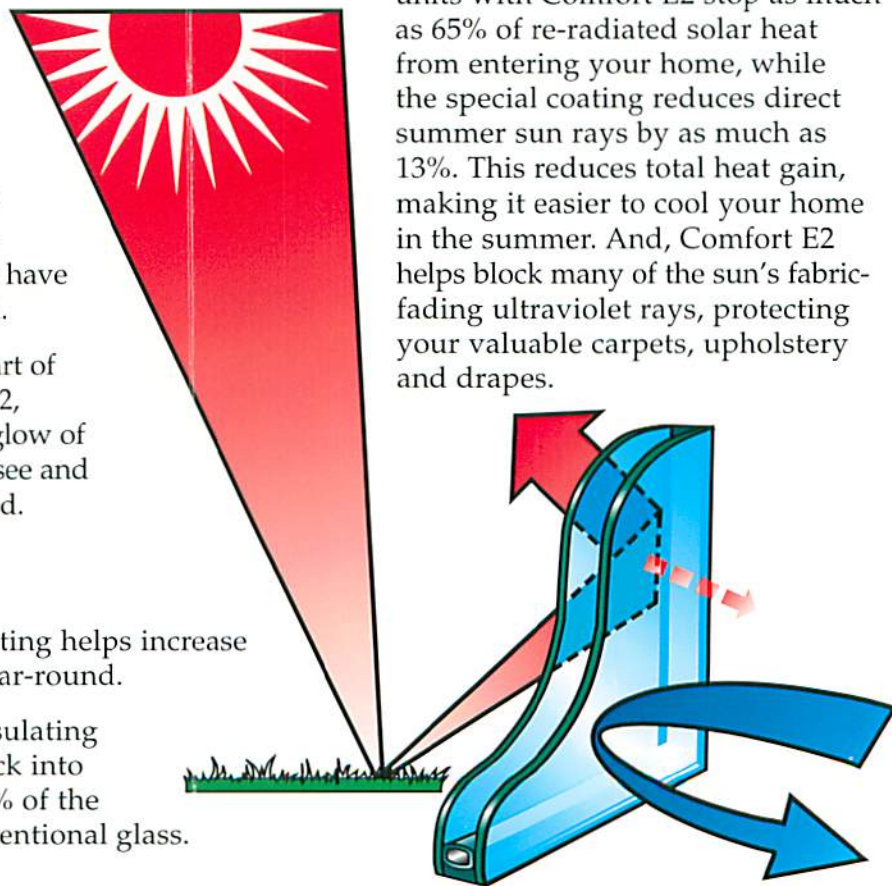

A GLASS FOR ALL SEASONS.

Comfort E2's special pyrolytic coating helps increase the efficiency of your windows year-round.

IN THE WINTER, Comfort E2 insulating glass units literally reflect heat back into the room, blocking as much as 71% of the heat that can escape through conventional glass.

Comfort E2's unique coating also allows *free* solar heat to enter from the outside. Because the glass blocks heat from escaping and allows free solar heat, the inside temperature of the glass is warmer. This helps minimize cold spots and drafts throughout the house. The result: you're more comfortable in your home, even at lower thermostat settings.

IN THE SUMMER, insulating glass units with Comfort E2 stop as much as 65% of re-radiated solar heat from entering your home, while the special coating reduces direct summer sun rays by as much as 13%. This reduces total heat gain, making it easier to cool your home in the summer. And, Comfort E2 helps block many of the sun's fabric-fading ultraviolet rays, protecting your valuable carpets, upholstery and drapes.

YOU MAKE IT HAPPEN.

YEAR-ROUND, Comfort E2 enhances the beauty of your home with a coating that minimizes the tint effect found in some high performance glass products so you can see the natural beauty of your world. And, Comfort E2's durable pyrolytic coating is so tough it's warranted against peeling or deterioration. See your dealer for details.

We've designed Comfort E2 to be efficient year-round. We've engineered it to be practical and durable in virtually any application. The rest is up to you and your imagination to do something extraordinary with windows in *your* home.

For more ideas on using windows made with Comfort E2 glass, ask your dealer.
