

Ultra-Clear Glass

Ordinary glass is green with envy.

Entrance Glazings

Starphire® Ultra-Clear Glass by PPG provides architects with an entrance glazing option that redefines elegance brilliantly. *Starphire* is the ideal solution for making your entrance sparkle with new impact and complement the entire building design. Lobbies and reception areas become breathtaking with the uncommon brightness of *Starphire*. *Starphire* glass doors set a new standard thanks to their jewel-like clarity and sparkling blue edges.

Starphire entrances are "clearly" remarkable:

- Maximized brightness: 7% higher Visible Light Transmittance than ordinary clear glass (in 1/2-inch glass thickness)
- Elimination of greenish tint to express doors' unprecedented radiance and incomparable clarity
- A new level of creative elegance
- Easily fabricated to required specifications

For exquisite and truly unique entryways, lobbies, and reception areas, *Starphire* glass will provide an unmatched combination of function, beauty, and brightness.

Starphire glass is available in thicknesses from 2.5 mm to 19 mm and is stocked regionally to assure consistent supply reliability. For *Starphire* samples or a list of distributors, contact our Solutions Hotline at 1-888-PPG-IDEA, or visit www.ppgstarphire.com. All PPG architectural glass is Cradle to Cradle Certified.™

1 Note: *Starphire*® glass edge color can vary depending on final glass size, glass thickness, and ambient lighting conditions. PPG recommends a full-size *Starphire* glass viewing to determine acceptability for final use.

Conventional Clear Glass

PPG Starphire Glass

Entrance Glazings

This side-by-side comparison of 1/2" doors demonstrates what *Starphire* glass can do for any entrance project. High-fidelity color transmission, a remarkable brightness and clarity, and jewel-like edges (below, right) make *Starphire* the obvious choice when you want your entrance to "clearly" stand out.

Alcoa Corporate Center
Pittsburgh, PA
